Bingham & Taylor
Est. 1849
PLASTIC & COMBINATION BOXES

Foreword

The plastic service, roadway and valve boxes depicted in this catalog are the product of extensive research and development by the team of Bingham & Taylor. These products were developed to further the needs of our customers and to offer an alternative to the use of our cast iron products.

CONTINUITY OF DESIGN: We are the original patentee of the Buffalo style design. This design has been in use for over a century and is used extensively by natural gas and water utilities throughout the world.

INTERCHANGEABILITY: Every effort has been made to make our cast iron and plastic box parts interchangeable. We have utilized the Buffalo style in most of the boxes shown. Cast iron top sections and lids can be used interchangeably with our plastic boxes.

DEPENDABILITY: A.B.S. (Acrylonitrile-Butadiene-Styrene) Plastic is high impact and wear resistant. This material has no aging qualities. Therefore, when used with sufficient cast iron at the ground surface, there will be little or no wear or deterioration. You can depend on Bingham & Taylor plastic boxes for a lifetime of trouble-free service.

QUALITY: As with all of our products, we have taken every step to maintain the high quality standards for which our name is known. You deserve this quality.

FLEXIBILITY & CREATIVITY: We are specialists in our field and devoted to the manufacture of quality service, roadway and valve boxes. We have taken the time to engineer various bottom sections with specific bell styles and arches to fit assorted plastic valves. Although we show a full line of boxes and accessories in this catalog, we still welcome your inquiries for special boxes and accessories to further fill your needs. We are happy to make ourselves available to you for any special requirements.

Bingham & Taylor Stab-Type Bottom Sections

— ORDERING INSTRUCTIONS —

We offer you an assortment of specialized bottom bell styles for use with your specific valve type. On pages 5 and 6 we display bell styles for use with your specific valve type. On page 12 we display bell styles available with our 400, 500, and 600 series.

To order specific bell styles for plastic boxes, please order as shown in the following example:

REQUIREMENT: 2 1/2" shaft plastic screw type curb box with length adjustment of 38"-60" with round "gas" lid. For use with perfection 3/4"-1 1/4" plastic curb stop. See table on page 3.

ORDER AS FOLLOWS: P—94—E—003 w/ round "gas" lid.

—003 designates bottom bell to fit perfection 3/4"-1 1/4" plastic curb stop as pictured on page 5.

(figure 2)
**P-199 Series Box**

Fig. No. 199  
P-199 Valve Box  
- Designed for use over valve that requires direct maintenance at the outer flanges. The 10" minimum I.D. allows tools to be operated directly from the surface.  
- Letters on lid as required. “Water” or “Gas”.  
- Heavy duty frame and lid.  
- Length adjustment as required.  
- Screw or sliding adjustment available.

**12" Series Box**

Fig. No. 1200  
P-1200 Valve Box  
- Designed for use over valve that requires direct maintenance at the outer figures. The 12" minimum I.D. allows tools to be operated directly from the surface.  
- Letters on lid as required. “Water” or “Gas” available.  
- Heavy duty frame and lid.  
- Length adjustment as required.

Fig. No. 1201  
P-1201 Valve Box  
- Designed for use over larger poly and steel valves that require direct maintenance.  
- Two-piece telescoping box with 12" I.D. top section and 15" I.D. bottom section. Length of top and bottom can be cut to customers specification.  
- Heavy duty cast iron rim and drop-turn locking lid. HS20 rated for heavy highway usage.  
- Lettering on lid as required by customer. "Water", and "Gas" are standard.  
- Valve box stabilizer available for poly or steel valves and can be sold as a unit with the 12" valve box assembly or sold separately.

**Valve Box Stabilizer Available**

- #ADP5001006S – Steel Valves  
- #ADP4001006P – Poly Valves
COMBINATION CAST IRON & PLASTIC CURB AND VALVE BOXES  
(Described as CIP Boxes)

The boxes shown on the next pages have standard Buffalo style cast iron top sections. The same tops as shown in our cast iron catalog.

The balance of the box is made of A.B.S. Plastic.

These boxes serve the same purpose as the all cast iron boxes.

Each box is furnished in the same ranges of extension as those in the cast iron catalog by using parts in similar lengths. However, by using combinations of shorter tops with longer bottoms, considerable cost savings can be achieved.

To determine length of box required, please refer to the tables on page 9 of our cast iron catalog.

Two important things to keep in mind are the range of extension you need and the overlap of pieces in order for the box to remain stable.

A parts list is shown in the tables for ordering.
Fig. No. 7000 & 7250

2 1/2" Combination Service Boxes

- We ship Fig. No. 7000 new style service boxes unless otherwise specified.
- A complete service box consists of lid with pentagon head bolt, cast iron top section and plastic bottom section.
- You can combine any of the above tops with any of the above bottoms to make the length box you desire.
- To reduce the cost, choose the shortest top that will give you the range of extension needed with longer plastic bottom.
- For available bell configurations see pages 5 and 6.
- N.S., N.S. Flush, and O.S. repair lids available, "Water" or "Gas".
- Only one length — 18" top section allowing for 14" range of extension.

A complete box consists of lid with pentagon head bolt, 18" cast iron top section and plastic bottom section.

Can be furnished with sliding bottom section if specified.

Extension sections available 12" long and in multiples of 6".

For available bell configurations see pages 5 and 6.

O.S. repair lids available, "Water" or "Gas".

5 1/4" Shaft CIP Boxes

Fig. No. 8000 & 8250

2-Piece Combination
Cast Iron Top with Plastic Bottoms

- A complete two-piece box consists of a lid, a cast iron top section and a plastic bottom section.
- These boxes can be furnished with locking lids in certain sizes.
- Lids "Water", "Gas" or "Sewer". Others at extra cost.
- Fig. No. 8250 has flange at bottom of top section. Specify if not wanted.
- You can reduce cost by using short cast iron tops and long bottoms. Keep in mind the extension range needed and allow up to 4" for overlap.
- Square tops can be furnished in certain sizes.
- For available bell configurations see page 12.
- Paving adapters available 1"- 4".

In order for us to quote delivered prices on any specified type and quantity of the valve boxes shown in this catalog, the following information is necessary:

1. Shipping destination.
2. Trench depth (surface to bottom of trench), bury (surface to top of pipe), or the minimum and maximum adjustment length that will serve.
3. Quantity of each size.
4. Size of valve box shown in this catalog, (2 1/2, 4 1/4, 5 1/4) shaft, etc.
5. Type of box desired, screw or sliding type, 2-piece or 3-piece.
6. Size of base required or size of valve you will cover.

The table on the page showing the type of boxes we furnish will assist you in acquiring this information. Also, we will be glad to help in any way to arrive at your requirements.

The Bingham & Taylor family of employees is dedicated to providing you, our customers, with the highest quality products, support and service to successfully satisfy your requirements.

Our service is fast and dependable, our prices are competitive and reasonable.

We have been in continuous business since 1849 serving water and gas industries.

Associate member of the American Water Works Association since 1882, member of the Water and Wastewater Equipment Manufacturers Association, Inc., and associated member of the American Gas Association.

In order for us to quote delivered prices on any specified type and quantity of the valve boxes shown in this catalog, the following information is necessary:

1. Shipping destination.
2. Trench depth (surface to bottom of trench), bury (surface to top of pipe), or the minimum and maximum adjustment length that will serve.
3. Quantity of each size.
4. Size of valve box shown in this catalog, (2 1/2, 4 1/4, 5 1/4) shaft, etc.
5. Type of box desired, screw or sliding type, 2-piece or 3-piece.
6. Size of base required or size of valve you will cover.

The provisions of this warranty shall not apply to any product which has not been properly installed, or subjected to misuse, negligence or accident or which shall have been repaired or altered in any way so as, in the judgement of Seller, to affect adversely its performance and reliability nor to any product which is used for a purpose for which it is not designed.

THIS WARRANTY TO REPLACE OR REPAIR DEFECTIVE PRODUCTS IS BUYER’S EXCLUSIVE REMEDY AND IS EXPRESSLY IN LIEU OF AND IS HERE BY IN DISCLAIMER OF ANY IMPLIED WARRANTIES OR MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AS WELL AS ALL OTHER IMPLIED WARRANTIES, IN LAW OR EQUITY, AND OF ALL OTHER OBLIGATIONS OR LIABILITIES ON SELLER’S PART. SELLER’S AGREEMENT HEREUNDER RUNS ONLY TO BUYER AND DOES NOT EXTEND EXPRESSLY OR BY IMPLICATION TO ANY OTHER PERSON. IN NO EVENT SHALL SELLER BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES, LOSS OF ANTICIPATED PROFITS OR OTHER ECONOMIC LOSS.

In the event that the other remedies fail of their essential purpose, Buyer’s sole and exclusive remedy shall be, upon return of the goods, the refund of whatever portion of the purchase price has been paid.

TERMINATION

Seller may, at its option, terminate this agreement whenever Buyer shall fail to comply with any of the provisions hereof.

All shipments are made F.O.B. Shipping Point

LOSS, DAMAGE AND OVER CHARGES

Consignee is responsible and must be particular about reporting all claims promptly when shipments arrive. All exceptions must be noted on the freight delivery receipt bills and endorsed by the delivering freight agent at time of arrival and the noted delivery receipts must accompany the claim. Careful compliance with the above procedure will insure prompt adjustments of claims.
Proudly Serving the water and Natural Gas Industries for over 160 Years
